

EDUARDO BRANDAU QUITETE

Geologist (1991), graduated by the Institute of Geosciences - USP. Master in Mineral Engineering (2002) by the Polytechnic School - USP 2002-2006 - Responsible for the Laboratory of Petrology and Technology of Rocks, Division of Geology - DIGEO, Institute of Technological Research of the State of São Paulo - IPT. He is currently a researcher at the Civil Construction Materials Laboratory of the IPT Infrastructure Works Technology Center.

Areas of expertise: ornamental and coating rocks, technological characterization of rocks and minerals for industrial application or civil construction, industrial minerals and gemology.

Main professional activities: execution and management of research projects in the areas of applied mineralogy and technological characterization of industrial and ornamental rocks.

Relevant activities:

- Worked as a geologist at the IPT since 1991, in the areas of mineralogy and rock technology.
- Masters: "Knoop hardness in rocks for coating - Methodology and correlation with abrasive wear".
- Member of the Special Studies Committee on Ornamental Rocks (CEE-187) of ABNT - Brazilian Association of Technical Standards.
- Member of the ABNT Concrete Aggregate Testing Commission (CE 018: 200.001).
